EXCLUSIVE TECHNOLOGIES

**UNILOCK**<sup>®</sup>  
DESIGNED TO CONNECT

SUPERIOR DURABILITY, TIMELESS APPEAL.

DEEP, RICH COLORS and a multitude of unique **Reala™ textures** combine to deliver the timeless beauty of Unilock Elegance. From the timeworn look of European cobblestones, to the classic luxury of riven natural stone slabs, our Elegance collection **offers styles you can't get anywhere else** and thanks to Ultima™ Concrete, the look you purchase is the look that will last, with up to **4x the strength** of poured-in-place concrete.

EXCLUSIVELY FROM **UNILOCK**

### Reala™

Utilizing REALA technology, a multitude of natural stone surfaces, brick and historic cobblestones are cast to create a wide variety of authentic textures with consistent dimensions that are more cost efficient to install.

**Without Ultima**  
*Deteriorating brick pavers exposed to deicing salts*

**With Ultima**  
*Unilock Town Hall pavers are built to last*

### Ultima™

Only Unilock has the technology in North America to manufacture Ultima Concrete resulting in pavers up to four times the stronger than poured concrete. With Ultima, the look you purchase is the look that will last.

## RICHCLIFF®

### SUPERIOR DURABILITY with timeless appeal

Inspired by the texture of natural cut flagstone, Richcliff offers superior durability and timeless appeal for commercial and residential projects.

A multitude of stone textures were cast using Reala Technology, to ensure that finished projects will have a completely random, and natural appearance. And unlike natural stone, which can crack, split and fade, Richcliff is virtually indestructible. Ultima Concrete Technology makes Richcliff up to four times stronger than conventional poured concrete.

A new large rectangle size is now available for use on its own or in combination with the traditional 3-stone random bundle for expanded patterning options and a larger scale look.

# COURTSTONE®

**OLD-WORLD ELEGANCE**  
with superior strength

The polished look of Courtstone brings a luxurious, old-world elegance to every project, with Ultima Concrete Technology which provides up to four times the strength of conventional poured concrete. Using Reala Technology, the unique shapes of Courtstone were cast from real European cobblestones, but manufactured with a consistent base for efficient installation and superior interlock. It's a look that has remained popular for centuries.

The stone's non-linear shape means it's possible to create smooth-looking curves with minimal cuts. This, in combination with a rich color palette, makes Courtstone a frequent choice for borders and banding accents.

# COPTHORNE®

## EUROPEAN INSPIRED PAVERS with delicate dimensions

Inspired by the rich color and timeworn beauty of European street pavers, Copthorne® offers more delicate dimensions than Town Hall®. These proportions make it possible to design curved walkways and borders using Copthorne, without the need for cutting.

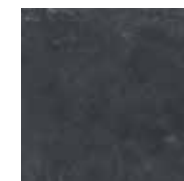

Cast using Reala Technology® for an authentic surface appearance, and using Ultima Concrete Technology to deliver up to four times the strength of conventional poured concrete, Copthorne offers timeless beauty for both residential and commercial projects..

## TOWN HALL®

### STREETSCAPE CHARM that stands the test of time

The substantial proportions and unique color blending of Town Hall is modeled after historic North American clay street pavers. The timeless look makes it an excellent choice for commercial and residential projects, in either traditional or permeable applications. The rich colors and classic shape also make it popular for borders, banding and other accents in pavers, walls and vertical features.

To ensure projects have a random appearance, Town Hall textures were cast from a multitude of different surfaces using Reala Technology and Ultima Concrete Technology was used to create superior durability. The result is vintage, streetscape charm that stands the test of time.
